PostgreSQL

AWS

PROJECTS

Sparkfive

- Sparkfive is a DAM (Digital Asset Management) application, where users can manage their digital files. I have worked on the user's action tracking and data analytics modules by using Next.js and Typescript.

Staredown

- Staredown is a gaming application, which is powered by Nest.js backend along with PostgreSQL and MongoDB.

BuyRadar

- The e-commerce web platform builds on top of React.js with Typescript, Bootstrap, and Redux toolkit. Responsible for handling major modules like cart, wishlist, API implementation, etc.

Sherlock

- PWA based on React.js, which detects people's personalities based on a few criteria. Play with formik, redux, mouse and touch events.

Galileo Education

- Web App based on React.js and Firebase for helping medical students in attempting case studies with DICOM viewer.

Cybird

- Chrome Extension based on React.js and Typescript for extracting candidate profiles from job platforms like LinkedIn and Xing. Apart from react.js, I have worked with the core Chrome functions and scripts as well.

Outright

- Outright is like a social media application with features like private messages, group chat, video calls and subscriptions for premium users. I worked on many modules and the AntMedia library for video streaming in React.js.

Flymypac

- React-based web app for package delivery via flights. Made interactive UI, state management, social login, and, API implementation.

Akunamatata

- An e-commerce web app with customer, vendor, and, admin modules. Responsible for handling APIs and database architecture using Node.js and MongoDB.

Freedel

- Grocery app which was powered by Node.js and MongoDB in the backend for customer, merchant and, admin module APIs.
